**basic electronics - nyu tandon school of engineering** - • silicon is the most common material used to build semiconductor devices. • si is the main ingredient of sand and it is estimated that a cubic mile of seawater contains 15,000 tons of si.  
**fundamentals of electric circuits - ung** - electric circuits are used in numerous electrical systems to accomplish different tasks. our objective in this book is not the study of various uses and applications of circuits. rather, our major concern is the analysis of the circuits. by the analysis of a circuit, we mean a study of the behavior of the circuit: how does it respond to a given input? how do the interconnected elements and ...
